Night Light

1.Selecting main light mode or night light mode

The product has two modes: main light mode and night light mode.

Main light mode provides full brightness and allows selection from five color temperatures: 2700K, 3000K, 3500K,4000K and 5000K.
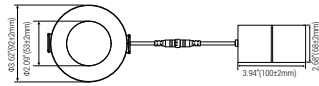

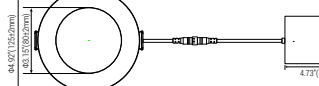

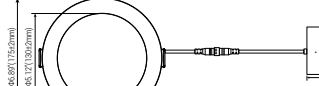

Night light mode provides reduced light output at 2000K color temperature for very soft illumination at night.

2.Convenient control using light switch

Every time when you turn on the downlight, it will always been main light mode.

Switch the downlight off and back on again within (1-4) seconds to activate night light mode.

NOTE:The main downlight will not provide light output when the night light trim is illuminated.
